

# WordPress Theme Installation

By: [OnlinebzDog.com](http://OnlinebzDog.com)

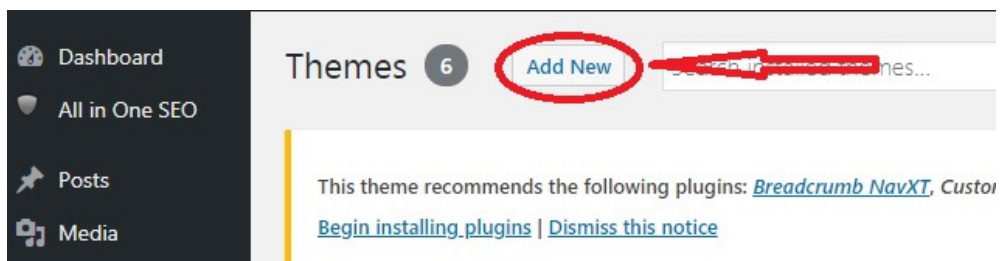

For WordPress them installation, follow these basic steps:

## **Install theme via your WordPress administration.**

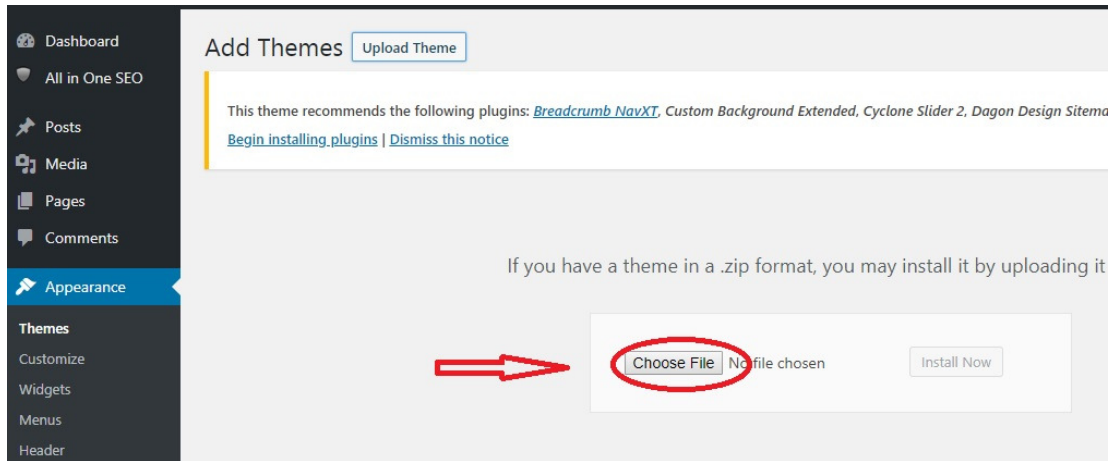

1. Log in to your WordPress website panel
2. Go to Appearance, then click on Themes

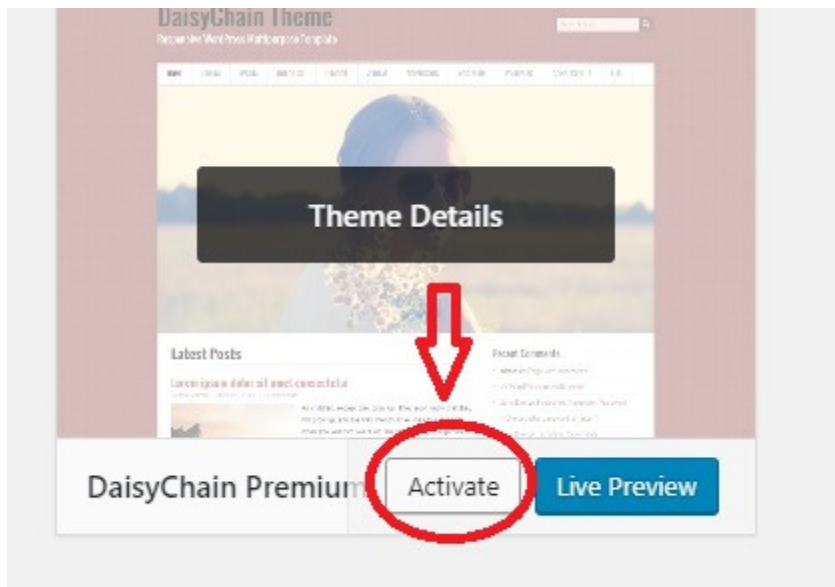

3. On the top click on Add New

4. Then click on Choose File to upload theme Zip file from your computer.

5. After uploading, Activate the theme.

### **Install them using FTP client**

This method is much difficult and required some knowledge of FTP software. *I recommend using WordPress Admin to upload.*

1. Extract the theme Zip folder
2. Using FTP client, upload the extracted them folder to "wp-content/themes" directory on your web host server.
3. Log in to your WordPress administration.
4. Select the "Appearance > Themes" panel.
5. Click on the "Activate" link to active theme.
