Hemp Oil

Why Hemp Oil?

Your Golden Ticket

Legal in all 50 states

Unlike cannabis, hemp oil is legal throughout the United States. This allows you to promote your product without the restrictions that cannabis normally has to operate under.

No Psychoactive Effects

THC is the active compound found in hemp that gives users the “high” feeling. Our hemp oil is produced to have zero THC, which in turn creates a wider audience that would like to take advantage of the benefits from hemp.

Promotes Healthy Living

Most importantly, our hemp oil is intended to work with our endocannabinoid system to promote homeostasis, which is the state of balance in our bodies.

The Endocannabinoid System

Our brain cells communicate with one another via neurotransmitters. Those neurotransmitters are sent from one cell to another carrying messages that cascade to the rest of your body producing various outcomes. In order for the neurotransmitters to have an effect, there has to be a receptor that accepts the message acting like a lock and key.

- Receptors built into their brain and immune cells
- Effects of CB1 and CB2 receptors include: *mood, appetite, memories, metabolism, pain, and more*
- Receptors (locks) and messengers (keys) produced in our own bodies
- Known as the **endocannabinoid system**.
- Cannabinoids acting as messengers found in our bodies are also found in hemp

The endocannabinoid system affects our body's homeostasis
